Meet your EHR.

It's simple to
use, lowers your
charting time,
packed full of
time saving
automations and
intuitive, making
it your dream
EHR.

Custom Indicators
Build your own
indicators to track
your patients.

Patient Chart

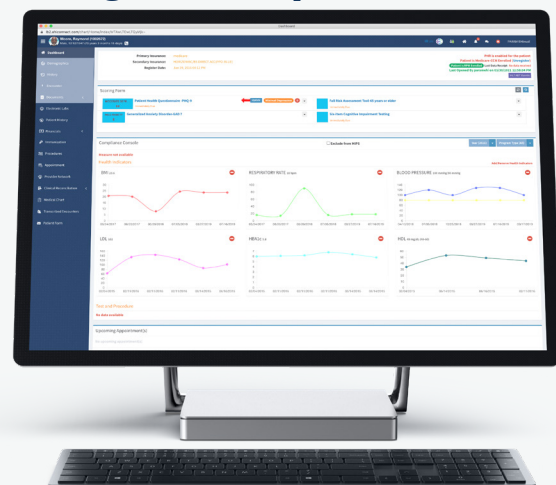

A holistic view of your
patients health when you
open their chart.

Interactive Clinical Intelligence
Intelligent engines assist in
accurate assessments based on
patient encounter data.

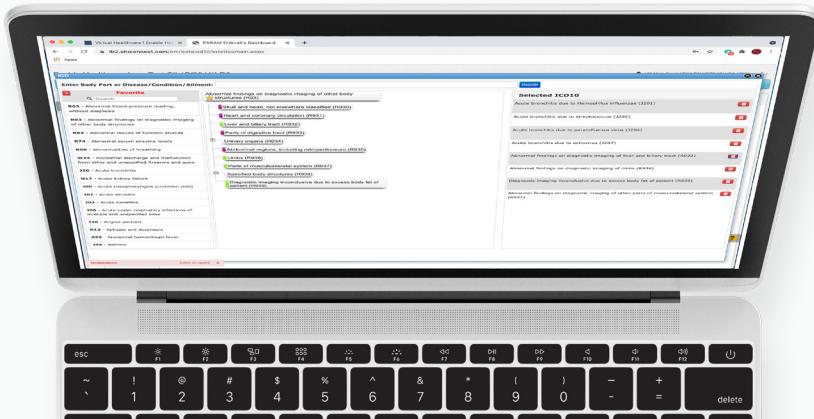

Free yourself from charting using our AI powered auto-documentation.

Using Artificial Intelligence, our
EHR sifts through information
that's available at the point
of service and automatically
creates documentation for your
encounter.

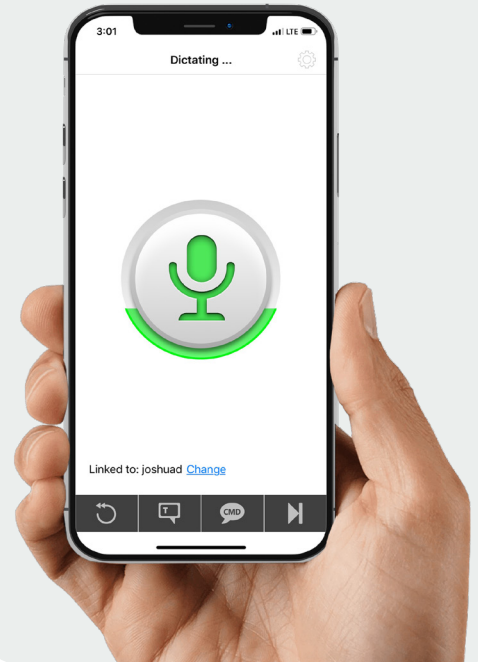

Intelligent coding.

Our EHR, based on HPI, auto detects coding requirements. Identifies gaps between HPI, assessment and plans to suggest the appropriate coding. Incorporates payer level quality reporting codes. Auto detects gaps in care and alerts providers. Scrubs for time sensitive codes, payer and patient level rules as well as validates service based on POS.

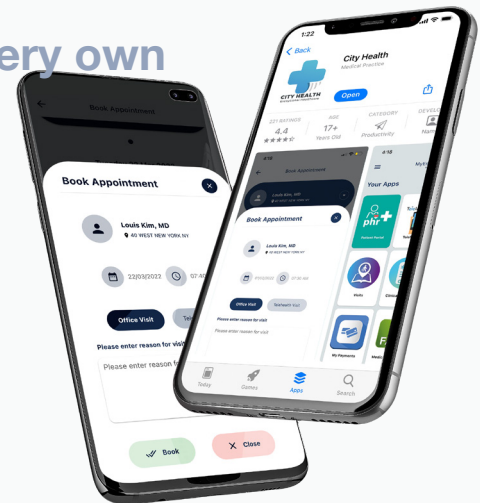

More facetime with your patients using our built-in voice recognition feature, **ARIA**.

If you're using our EHR you'll get your very own practice-branded mobile app.

Manage your practice and patients conveniently and securely with a branded mobile app available to download on iOS and Android devices. Plus, all your patients can download your app to book appointments, pay co-payments, message providers, check lab results and more.

Integrated with virtual healthcare.

Partner with your next EHR company, Enable Healthcare, today.
