EQIP Final Eligibility Audit and Probation Status

- <u>Volume Thresholds</u>: Due to the composite of final Care Partner lists, some entities fell below threshold for certain episodes. Participation in those episodes was terminated, other episodes continued.

- <u>Claim Threshold</u>: EQIP Entities must have at least 75% of their enrolled Care Partners with at least one claim included in an episode's window for the baseline period (CY 2019). Care Partners who do NOT touch a claim in baseline are considered on probation and must touch a claim in PY1 to be eligible for PY2.

- <u>Quality Metrics</u>: If Entity did NOT meet minimal quality performance during baseline period, entity will be placed on probation for PY1. Two consecutive performance years on probation will result in automatic removal of the Entity from EQIP.
