

# MedChi Remote Patient Monitoring Opportunities

## Enable Healthcare Inc (EHI)

- Enable Healthcare, Inc. (EHI) was formed in 2008 to deliver Health Information Technology Products, Solutions & Services to healthcare practices. EHI services are spread across the nation to over 5,300 practices.
- EHI's RPM Solution offers a smartphone, Bluetooth-enabled medical devices, supplemental staff, access to specialists and IT support for providers and their patient's.
- Their RPM solution can increase practice revenue by over \$120 per patient per month.
- For more information on EHI please visit [www.ehiehr.com](http://www.ehiehr.com) or call/text 240-436-3119.

## Pain Scored

- Pain Scored is a remote monitoring service for Chronic Pain. It started as a way to digitize the pain diary and has evolved into a system for improving care and practice metrics. Pain Scored allows any clinician to feel comfortable monitoring patients with chronic pain through data driven patient engagement. Its optimized to fit into the workflow of a busy primary care practice or an intensive pain group.
- Pain Scored has the added advantage of providing opportunities for additional reimbursement.
- Learn more at [www.painscored.com](http://www.painscored.com) or call (410) 934-7862.
