

All-In-One Mobile Prescribing and PDMP Look-Up

Simple. Powerful. Fast.

Now, prescribing gets even more convenient for physicians and patients. iPrescribe® brings you the full power of e-prescribing in a simple, user-friendly app with controlled and non-controlled drug prescribing, robust medication history data, in-workflow prescription drug monitoring program (PDMP) checking, clinical alerts, and patient-specific out-of-pocket drug costs.

Better Prescribing Accuracy and Streamlined Workflow

With iPrescribe, you can prescribe in a few simple taps from anywhere in the world. You'll never want to pull out your prescription pad or call the pharmacy again.

SAVE TIME: Predictive analytics makes prescribing easier with commonly prescribed medications and complete sig data based on the patient, diagnosis codes, and your prescribing patterns.

PROVIDE VALUE: Real-time drug pricing lets your patients know their out-of-pocket costs before they leave your office.

WORK SMARTER: Prescriptions flow through to medication history to keep patient history up to date.

COMMUNICATE SECURELY: The integrated Backline® secure communication tool allows you to easily communicate with peers, pharmacists, and patients.

Prepare for EPCS and PDMP Query Mandates

The Support for Patients and Communities Act (H.R. 6)* becomes active January 1, 2021, and requires providers to use electronic prescriptions for controlled substances (EPCS) for all CS II, III, IV, and V Medicare Part D or Medicare Advantage Prescription Drug Plan (MA-PD) transactions.

Most states already mandate PDMP checking or have legislation pending—and it's only a matter of time before all states follow suit.

COMPLETE PRESCRIPTIONS 3X FASTER

iPrescribe's direct integration with state PDMPs allows you to meet the PDMP mandate without having to leave your prescribing workflow to log into a separate tool. Customers who use this unique in-workflow integration completed their prescriptions three times faster.

Visit iprescribe.app/all-in-one to get started today!

*CMS is considering a delay to this mandate, but providers should take steps now to comply with the new requirement.
