Options

Remote Patient Monitoring (RPM)

What is RPM?

- The use of remote technology to track and assess a patient's health condition(s) and improve health outcomes.
- Allows patient care to extend beyond your office.

RPM Guidelines

- **Patient Relationship:** Requires an established patient relationship.
- **Condition Monitoring:** Must monitor an acute or chronic condition.
- **Billing:** Only one practitioner can bill for RPM per patient in 30 days.
- **Care Management Services:** Can be billed with CCM, TCM, BHI, PCM, CPM if time and effort are not double-counted.
- **Device Requirements:** Must use FDA-approved medical devices with secure data upload.
- **Patient Consent:** The provider must obtain the patient's written or oral consent before billing for the program.

Typical Devices:

Pulse
Oximeter

Glucometer

Blood
Pressure
Monitor

Weight
Scale

Chronic Care Management (CCM)

What is CCM?

- Coordinated care services offered to Medicare beneficiaries with two or more chronic conditions expected to last for at least 12 months or longer.

Benefits of CCM

- Increased patient compliance.
- Can decrease emergency department visits, falls, or worsening health.

Examples of chronic conditions monitored through CCM:

- Arthritis
- Cancer
- Depression
- Diabetes
- High blood pressure

Services may include:

- Personalized care plan in a certified EHR and a copy provided to patient.
- 24/7 patient access to a member of the care team for urgent needs.
- Enhanced non-face-to-face communication between patient and care team.
- Management of care transitions.

Add Value To Your Practice

Benefits:

- Generate **additional monthly revenue** through eligible Medicare services.
- Strengthen patient relationships and satisfaction.
- Improve chronic disease management and care coordination.
- Reduce avoidable hospitalizations and emergency department visits.
- Enhance value-based care and quality performance metrics.

OnCare360

Benefits:

- Patient outreach and engagement
- Patient enrollment
- Care plan development
- RPM set up and logistics
- Monthly clinical check-ins

Website

How It Works:

Zero Lift, No Upfront Cost

Turnkey enrollment, outreach, and documentation, handled end to end. No upfront cost, nothing new added to your staff's plate.

Fits Your Current Workflow

Referrals, escalations, and day to day communication happen directly inside the charts you already use. Providers simply check RPM readings in the OnCare360 portal when the patient is in office.

Any Device, Same Simplicity

Device-agnostic platform built on cellular technology. Patients plug in and go, with no smartphone or Wi-Fi required.

Compliant By Design

Runs on CMS's established care management billing codes, with consent, documentation, and audit ready workflows built in.

Already vetted. No upfront cost. Live in days.

BioFi

Benefits:

- No-touch remote patient monitoring
- No action required from patients
- Tracks vital signs automatically
- Helps improve patient compliance
- Fits easily into patients' daily routines
- Low-maintenance option for practices

Website

RemWave™ sits under the bed and passively captures relevant, continuous physiologic activity data — no wearables, no patient interaction. Patients simply sleep.

How It Works:

The Problem

Other RPM programs fail because:

- Patients resist taking readings
- Devices are complicated
- Staff chases compliance
- Billing requirements are complex

Why Choose BioFi

- Passive monitoring = higher compliance
- White-glove setup = no staff burden
- Clinical monitoring team
- Reliable reimbursement

Fully Managed Program

BioFi handles:

- Patient consent
- Device installation
- Monitoring & outreach
- Compliance documentation
- Billing support

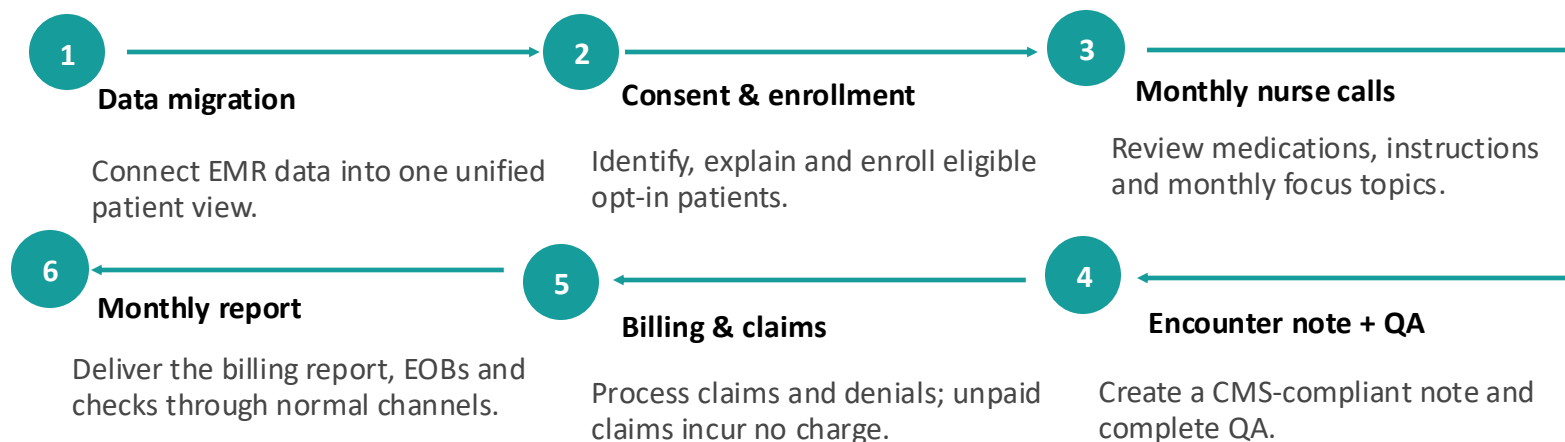

After enrollment, all monitoring and care coordination are managed under the provider's general supervision.

Enable Healthcare Inc. (EHI)

Benefits:

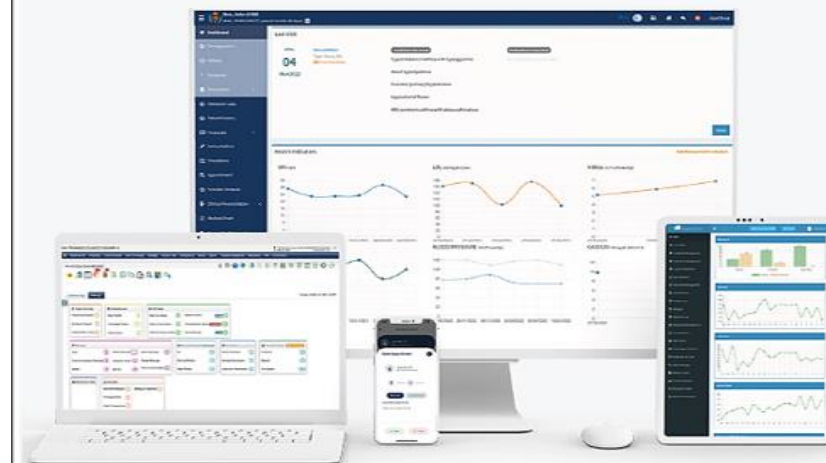

- AI-powered EHR, practice management, and revenue cycle workflows
- Enhanced patient engagement and care coordination
- Smarter healthcare operations with ariaone™ Companion AI Apps
- Improved efficiency and reduced administrative burden
- Better-informed decision-making through intelligent automation

How it Works:

The only **EHR** that works with you.

Our AI powered EHR is simple to use, drastically lowers your charting time, and packed full of time saving automations, making it your dream EHR.
