Expand your patient care reach beyond the office with our cellular-enabled medical devices and our AI-driven Remote Patient Monitoring application.

Pulse Oximeter

Glucometer

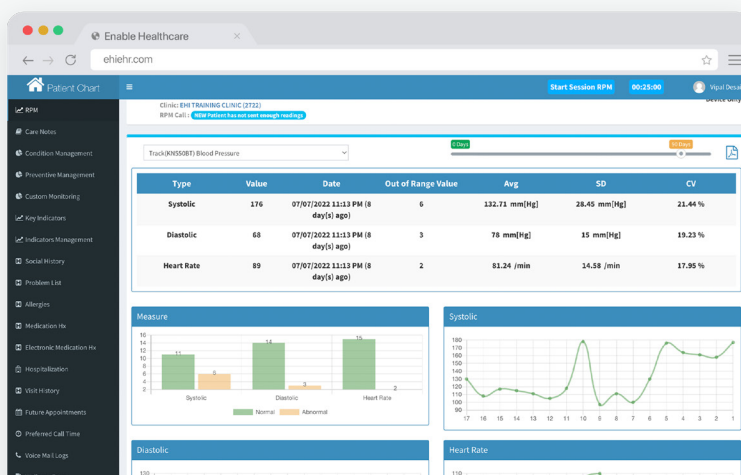

Blood Pressure

Weight Scale

Highly accurate
& easy-to-use
devices

Our dashboards and analytic tools are designed to give you real-time information to allow you to make quick and informed decisions.

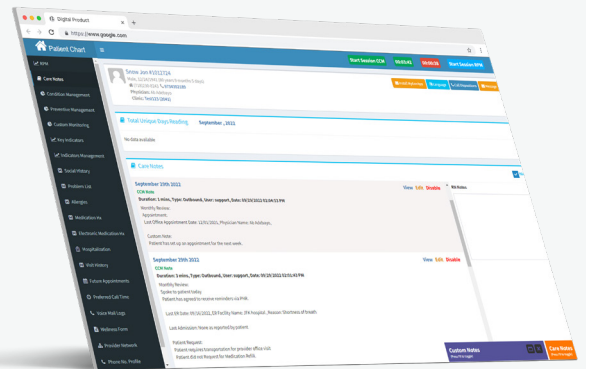

Our AI-driven RPM app allows users to maximize clinic time and optimize communications between practices and the care coordination team. They will screen your patients' readings and communicate with your practice when they are found to be abnormal. Our application is able to capture all interactions and intelligently generate comprehensive, CCM-compliant notes for billing.

Our **Care Coordination Team**, comprised of registered nurses and healthcare professionals supplement your existing staff. They will screen your patients' readings and will communicate with your practice.

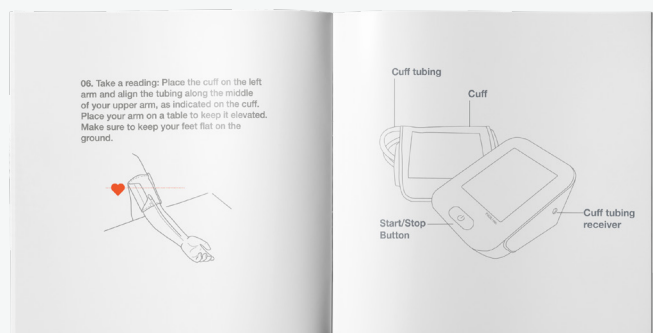

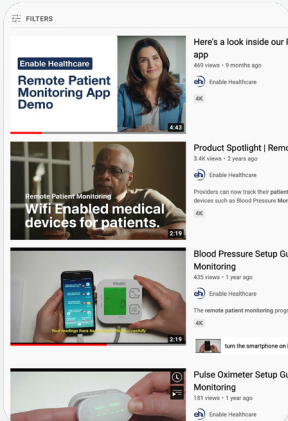

We handle it all.
From enrollment to marketing, patient care and billing.

Our application is able to capture all interactions and generate analytical notes to create a comprehensive encounter note for billing.

Delivering the highest patient enrollment & compliance with our RPM application, online device tutorials and quick set-up guides.
