Community Health Resources Commission
Budget Hearing
Senate Budget & Taxation Committee
Subcommittee on Health and Human Services
March 7, 2013

MedChi wishes to register its strong support for the proposed budget of the Community Health Resources Commission (CHRC). The Commission, first created to provide a mechanism for the State to provide grant funding to creative community based projects with the objective of identifying approaches to addressing Maryland's access to care challenges in underserved communities has been an invaluable force in Maryland's ongoing effort to assure adequate access to high quality health care services to all Maryland residents.

The Commission's impact on this objective is notable and has been recognized by policy makers as new initiatives related to the medically underserved have been identified. The Governor's Health Enterprise Zone initiative appropriately placed responsibility for the administration of the program with the CHRC recognizing its expanded expertise and sophistication in identifying and prioritizing State objectives regarding unmet community based need. MedChi fully supports the expanded work of the Commission and urges the adoption of the CHRC budget as proposed.
