## **MEDCHI COLLABORATES WITH ENABLE HEALTHCARE AS A RESOURCE FOR REMOTE PATIENT MONITORING AND OTHER VALUE BASED CARE SOLUTIONS**

BALTIMORE, October 26, 2020 — MedChi has entered into a collaboration with Enable Healthcare (EHI) which will give Maryland physicians access to Remote Patient Monitoring as well as other value-based care solutions.

Remote Patient Monitoring (RPM) is becoming an important component of care that contributes to better patient outcomes and higher satisfaction. RPM facilitates medical information to be captured automatically and shared remotely. It enables comprehensive patient-centric care for elderly and high-risk patients, remotely reducing ER visits and unscheduled hospitalization. Additionally, RPM empowers patients to avoid exposure to COVID-19 by capturing health information in the comfort of their home.

Treatment failure and admission to a hospital are not options in the time of COVID-19 so there are clinical and economic reasons to embrace what you may have been reluctant to do in the past. MedChi believes every practice should embrace RPM to maintain patient care, monitor therapeutic benefit, and identify problems before they become serious.

EHI can provide patients with at-home monitoring devices including blood pressure cuffs, weight scales, pulse oximeters, and glucometers. Exclusive for MedChi providers, patients can receive a smartphone with any one device to overcome patient limitations and increase access to remote care. Additionally, a provider can elect for monthly care management to be conducted by EHI, allowing the provider to bill for additional Current Procedural Terminology codes and receive a higher reimbursement.

MedChi CEO, Gene Ransom, states “remote patient monitoring has emerged as a technology tool that expands access and improves outcomes, and MedChi is pleased to share a resource for this important service for Maryland’s physicians and patients.”

### About MedChi

MedChi, The Maryland State Medical Society, is a non-profit membership association of Maryland physicians. It is the largest physician organization in Maryland. The mission of MedChi is to serve as Maryland's foremost advocate and resource for physicians, their patients and the public health of Maryland.
